

Nutritional Testing Service

From UK and EU labelling to regulatory compliance and retailer approval, our reliable service gives you the expert support you need.

What if you could work with a trusted experienced ISO accredited laboratory partner who delivers on time and reliable quality nutritional data you need and provides the best expert guidance too?

Here at RSSL, we provide all of this and more.

Our highly experienced team uses the latest nutritional testing technologies in ISO-accredited labs to **deliver a level of service that is hard to match.**

- EU and UK food labelling requirements
- Nutritional and health claims substantiation
- HFSS classification and reformulation
- NPD and product innovation
- Retailer listing requirements
- Brand protection and quality assurance

Accurate and reliable nutritional testing

Working in close partnership with our clients we help ensure products meet the highest standards of accuracy, safety and quality.

You benefit from tailored testing programmes, designed around agreed objectives, timeframes and budgets. Plus, the option to broaden the scope to include wider analytical support.

Comprehensive analysis

Our full suite of testing solutions streamlines efficiencies and achieves consistently reliable outcomes across all categories for:

- Ash, carbohydrates, energy, fat, moisture, protein, dietary fibre, fatty acid profile, salt and sugar
- Vitamins and minerals
- Shelf life, allergens, meat and fish speciation
